

# University of Montana, Department of Anthropology

## Program Information

Program Name	University of Montana, Department of Anthropology
General Description / Special Programs	The University of Montana Department of Anthropology provides a curriculum that will help students understand and appreciate the range of human cultures as well as the significance of biological evolution of the human condition. Through our undergraduate and graduate programs students not only achieve a broad cross-cultural education, but prepare to apply their anthropological knowledge in their chosen career paths. A minor, Bachelor of Arts, Master of Arts, and Doctor of Philosophy degrees are offered in anthropology, with options or specializations available at every level. For undergraduates, the B.A. can include an option in Archaeology, Cultural and Ethnic Diversity, Forensic Anthropology, Linguistics, or Medical Anthropology - or a general degree crafted to the interests of the student. Parallel missions to promote the student of human diversity and experience are advanced by the Linguistics Program, which is also housed in the Department. Additional offerings are certificates in Forensic Science and Historic Preservation; these certificates are interdisciplinary by nature, but are administered within the Anthropology Department.
