Program Details

Experience Offered	<ul style="list-style-type: none">• Internship
Research Facilities	SRS facilities include over 6000 square feet of office and lab space, including specialized laboratories for archaeology, paleontology, and soils analysis. The company maintains a full suite of traditional field equipment as well as specialized mechanical excavation equipment and a full complement of geophysical testing instrumentation. Collections: All artifact and ecofact collections resulting from fieldwork are stored in appropriate regional or local facilities. Facilities for Visiting Scholars: Files, maps, photos and a technical library are available to Visiting Scholars by appointment.
Library Resources	SRS maintains a small specialized library containing over 10,000 books and articles concentrating on California prehistory, history, ethnography, geology, paleontology, biology, and worldwide nautical chart coverage. The map library contains over 600 plat maps, and historic and current USGS quads.
Internships Available	
Internship Info	Internships: are occasionally available which provide training for students from local colleges and universities.
Internship Required	
Publications	A Report with limited distribution is issued at the end of each project
