

INTEL Corporation

Program Information

Program Name	INTEL Corporation
General Description / Special Programs	Intel Corporation is the world's largest semiconductor chip maker, developing advanced integrated digital technology for the computing and communications industries. As technology use matures and is incorporated into numerous daily practices, Intel has increasingly focused on delivering platforms that address the specific needs and environments of a large and diverse number of people worldwide. Several multi-disciplinary research teams, integrated into Intel's labs and major business groups, help drive this innovation from a deep understanding of people's practices, values and meanings.
