Current Research

I am co-directing a multi-year, interdisciplinary research project in Southeastern Newfoundland currently funded by a 3-year NSF grant to examine the human-environment interaction of various cultures (prehistoric through historic). This includes: archaeological excavation at sites along the coasts of Newfoundland and Labrador; extensive systematic survey of the region; environmental research to obtain proxy data to reconstruct past climatic, ecological, and geological conditions; and ethnohistoric research focusing on contact between groups, post-contact relationships and adaptations, and their correlation to environmental change, demographic shifts, and colonization events.

I am examining the role that drums play throughout Arctic cultures. My early focus is on prehistoric drums from the North American Arctic and Greenland and their relationships to contemporary peoples in that region and across the Bering Strait in Chukotka and northern Siberia. The research focuses on extant collections in many international institutions and collections and will include new ethnoarchaeological/ethnomusicological research in the circumpolar region. I am particularly interested in historical intercultural relationships and diachronic changes in drum use and production and what they may tell us of broader issues, such as human migration, ideological development, and religious transformation.

Research Experience

2013-Present Conducting an ethnoarchaeological project on the use and production of drums throughout the Arctic and Subarctic.

2009-Present Co-direct a field research project at the Stock Cove site, Trinity Bay, Newfoundland examining the dynamics of the Maritime Archaic settlement, the Paleoeskimo to Recent Indian transition, and the early contact period between Beothuk and Europeans, through an historical ecological perspective.

2011- Present Leading the investigation at the prehistoric/protohistoric Allen Farm Site, Peru, NY. Includes supervising SUNY-Plattsburgh students in survey, excavation, and collections analysis of this multicomponent site.

2013 Conducted archaeological excavation at the Viking Age Cave Site, Surtshellir, Iceland with Kevin Smith of Brown University's Haffenreffer Museum of Anthropology.

2010-2011 Archaeologist/Case Officer working with Pacific Northwest and Alaskan Native groups in assessing collections housed at the National Museum of Natural History, Washington, DC for cultural affiliation and repatriation.

2010-2011 Conducted faunal analyses of remains from a shell midden site on Agattu Island of the Aleutian Islands with Stephen Loring of the Smithsonian Institution to examine the historical ecology of that island and compare it with evidence documented from other parts of the island chain and northern Pacific.

- 2005-2011 Conducted historical ecological research in the Chesapeake Bay and California Channel Islands with Dr. Torben Rick of the Smithsonian Institution investigating shellfish procurement and impact by prehistoric and historic indigenous peoples.
- 2008-2010 Conducting collections-based XRF analyses through a joint research fellowship between the National Museum of Natural History and Museum Conservation Institute at the Smithsonian Institution, examining sources of slate used by the Maritime Archaic peoples of Newfoundland and Labrador.
- 2009 Conducted excavation in Iceland on a farm (Gilsbakki) containing historic, Medieval, and Viking Age materials, directed by Kevin Smith of the Haffenreffer Museum at Brown University and Michele Smith from the Rhode Island School of Design.
- 2008 Directed test excavation and survey at the Stock Cove site on the northeastern coast of Newfoundland to determine research strategies and potential for a multi-year, interdisciplinary project in that region.
- 2006 Designed and directed a project that involved the excavation of three Maritime Archaic structures at White Point, Northern Labrador as part of my Ph.D. project at Southern Methodist University.
- 2006 Conducted excavation of an Early Neolithic site at Nabta Playa, in the Western Desert of Egypt, and survey of the desert margins along the east and west banks of the Nile between Aswan and Kom Ombo with Drs. Fred Wendorf and Romauld Schild of the Combined Prehistoric Expedition.
- 2003-2006 Conducted research on several Paleoindian (Folsom) sites in West Texas and Southern Colorado with Dr. David Meltzer of Southern Methodist University.
- 2002 Designed and directed a project that included the excavation of three Paleoeskimo sites on Huntingdon and Horse Chops Islands off the coast of Central Labrador as part of my M.A. research project at Memorial University.
- 2001 Conducted survey of the Porcupine Strand region of southern Labrador with Dr. Lisa Rankin of Memorial University.
- 2000 Worked for the Háls Archaeological Project directed by Kevin Smith of the Haffenreffer Museum at Brown University excavating an iron production site and an associated pithouse from the early Settlement Period of Viking Age Iceland.
