

# York College of Pennsylvania

## Program Information

Program Name	York College of Pennsylvania
General Description / Special Programs	The anthropology concentration and/or minor within the Department of Behavioral Sciences at York College of Pennsylvania has an applied learning experience focus. Department specializations in anthropology permit the opportunity for 'hands-on' learning in forensic anthropology, bioarchaeology, and/or archaeology. In addition, students can focus in cultural anthropology using an applied anthropology perspective and be supported through our Center for Community Engagement. Our behavioral sciences degree program is designed to expose and prepare students for a variety of careers within the social and behavioral sciences, as well as for graduate study. We encourage students to extend learning beyond the classroom and support our scholars in identifying opportunities for internships, participation in faculty research, volunteer projects, and field schools.
