

# Innovation Gallery, Center for Archaeology and Society

## Program Information

Program Name	Innovation Gallery, Center for Archaeology and Society
General Description / Special Programs	As a showcase for our innovative faculty and student research, the Museum of Anthropology and its partner facility, the Deer Valley Rock Art Center, are integral to the mission of the Arizona State University School of Human Evolution and Social Change. They are places where the wider community can explore the importance and impact of anthropological insights to better understand the challenges of living in our increasingly global and complex world. We share the many ways in which cultural expression finds form and highlight creative and adaptive strategies pursued by human communities in different places and in different times as they experience and respond to change. Museum students work in these dynamic, interdisciplinary spaces, organizing exhibitions and programming. Tours, exhibit opening receptions, lectures, symposia and special events are offered regularly.
