

University of Notre Dame, Department of Anthropology

Program Information

Program Name	University of Notre Dame, Department of Anthropology
General Description / Special Programs	The Department of Anthropology is committed to a multidimensional inquiry into what it is to be human—past and present, nearby and distant. Notre Dame's Anthropology program explores the richness and diversity of the discipline by building bridges between various humanistic and scientific approaches. We seek to involve faculty and students in integrative anthropology, including engagement with different anthropological and interdisciplinary perspectives, integration of theory and application, and integration of teaching, research, and ethics. We train undergraduate and graduate students to harness these strengths in basic research, in effective teaching, and in the application of anthropology both inside and outside of academia. The department's research and doctoral training program emphasizes the integration of the major anthropological subfields: archaeology, sociocultural anthropology, biological anthropology, and linguistic anthropology. This is seen in faculty research, graduate education, and undergraduate curriculum.

Phd Requirements	<p>The doctoral program is designed to enable students to spend a major part of their graduate work on their chosen specialties. Doctoral candidates follow a trajectory of study in methods and theory, based on the sub-fields of Anthropology, with flexible language, laboratory and field training depending upon perceived need and as determined by their individual research agenda. Along with required courses in the first two years of study, at the end of each spring students prepare and present a research project. In the fall term third-year students take comprehensive examinations, and prepare a formal dissertation proposal that is suitable for submission to an external funding agency. The dissertation and oral defense are the final steps in the PhD requirement with the goal of completing all requirements within 5 years.</p>
