

Franklin Pierce University

Program Information

Program Name	Franklin Pierce University
General Description / Special Programs	Within the context of a liberal arts education, the Anthropology Department offers students the opportunity to build general competency or to specialize in archaeology, cultural anthropology, or applied anthropology. Course selection is guided by a major professor in light of specific student needs and may include course work in other divisions. Although not all students need to, or want to, attend graduate school, a faculty adviser will assist those majors interested in preparing for graduate school. The Women in Leadership Certificate Program is an interdisciplinary program focusing on the interconnections among gender, race, class, sexuality, and transnational issues. The Global Citizenship Certificate Program offers an integrative approach to building a global community that involves human interdependence, equality, and justice. The Monadnock Archaeological Project provides opportunities to excavate and study Native American sites in southwestern New Hampshire.
